

Editing and Finishing in DaVinci Resolve 12

1. Introduction

- Resolve vs. Resolve Studio
- Working in the Project Manager
- Setting up a Multi-User Login
- Accessing the Database Manager
- Understanding Database Types
- Switching Between Databases

2. Choosing Preferences

- Choosing a Scratch Disk
- System Preferences
- Video I/O and GPU Settings
- Audio Preferences
- Control Panels

3. The Project Manager

- Exploring the Project Manager UI
- Adding Projects to Folders
- How Projects are Organized
- Moving Projects via Copy/Paste
- Changing the Project Manager Appearance
- Searching for Projects
- Copying Projects Between Databases

4. Relinking Media

- Importing a DRP File
- Selecting Items for Relinking
- Relinking Project Media
- Saving the Project
- Renaming a Project
- Archiving a Project

5. Setting up a Project

- Accessing Project Settings
- The Master Project Settings
- Choosing a Timeline Resolution

- Pixel Aspect Ratio
- Timeline Frame Rate
- Video Monitoring
- Conform Options
- Working with Mixed Frame Rates
- Image Processing
- Working with Interlaced Footage
- Choosing Video I/O Options
- Video Bit Depth - Performance over Quality
- EDL & Media Composer Conform Options
- Image Scaling
- Output Scaling

6. Project Organization

- Use Timelines Bin
- Use Smart Bin for Timelines
- Creating Sub Bins in the Timelines Bin

7. Keyboard Mapping

- Keyboard Sets
- Modifying a Shortcut
- Saving a Mapping Preset
- Auto Save Options

8. Importing from Other NLEs

- Load XML Options

9. Touring the Resolve UI

- Choosing a Workspace
- Choosing a Layout
- Resetting the Layout
- Resizing UI Panels
- The UI Toolbar
- The Media Pool
- Importing via Drag and Drop
- The Viewer
- Audio Meters
- The Metadata Editor
- Creating Custom Metadata Sets

10. Exploring the Edit Page

- The Media Pool
- The Source Viewer
- The Timeline Viewer

11. Quick Tour of the Timeline

12. Quick Tour of the Color & Deliver Pages

- Resolve's 4 Part Workflow

13. Importing Media

- Opening Project Zero
- Locating Media in the Media Storage Browser
- Viewing Folder Hierarchies
- Previewing Clips in the Viewer
- Revealing Duration & Timecode
- Media Import Options
- Importing Into Media Pool Bins
- Drag & Drop Importing
- Adding a Favorite
- Drag & Drop from the Desktop

14. Cloning Media for Backups

- Adding a Job
- Set as Clone Source Option

15. Importing Individual Frames

16. Organizing the Media Pool

- Creating Bins
- Adding Clips to a Bin
- Adding a Sub-Bin
- Using Smart Bins
- Color Coding Bins
- Filter by Color Tag
- Organizing Bin Content
- Customizing the Metadata Column View
- Sorting Column Metadata

- Media Pool Searching

17. Clip Metadata

- Viewing Clip Metadata
- Editing Metadata
- Approaches to Adding Metadata
- Using Keywords

18. Editing Clip Attributes

- Video Attributes
- Audio Attributes
- Timecode Attributes
- Name Attributes

19. Syncing Audio

- Auto Syncing by Waveform
- Verifying Audio Sync
- Manually Syncing Clips
- Track Remapping

20. Working with RAW Media

21. Working with Log Encoded Media

- Resolve Color Management
- Input to Timeline Color Space Conversion
- Applying a Color Space
- Bypassing a Chosen Color Space

22. Best Light Grades for Editing

- Using Remote Grades
- The Benefits of Using Remote Grades
- Copying Remote Grades
- Sharing Remote Grades Between Timelines

23. Improving Performance

- Optimizing Media for Playback
- Using Smart Bins to Collate RAW Clips
- Generating Optimized Media
- Identifying Optimized Clips

- Choosing the Optimized Media Format
- When to Use a Float Format
- Choosing a Resolution
- Switching Between Optimized & Original Media
- Deleting Optimized Media
- Reducing Playback Resolution
- Using Smart Cache

24. Clip Logging and Prep

- Adding a Display Name
- Using Metadata for Display Names
- Copy & Pasting Metadata Variables

25. Marking Clips

- Marking In and Out Points
- Adding a Marker
- Navigating to Markers
- Creating a Subclip

26. Advanced Media Management

- Copying Media
- Moving Media
- Transcoding Media
- Media Managing Clips

27. Source & Timeline Viewers

- Opening the Project
- Resetting the Workspace
- Changing the Viewer Mode
- The Transport Controls
- JKL Transport Controls
- Looping Playback
- Zooming the Viewer
- Marking In and Out Points
- Show All Video Frames
- The Timeline Viewer
- Switching Timelines
- Scrubbing the Timeline
- Transform & Crop

28. The Timeline

- How Audio is Organized
- The Toolbar
- Timeline View Options
- Zooming the Timeline

29. Working with Tracks

- Destination Controls
- Disabling Tracks
- Editing Track Labels
- Locking Tracks
- Auto Select Controls
- Audio Track Controls
- The Master Track
- Rearranging Tracks

30. The Effects Library

31. The Edit Index

32. The Inspector

33. The Audio Meters

34. The Clip and Track Mixer

35. Preparing Clips for Editing

- Hover Scrubbing Clips
- Working in List View
- Viewing Clip Filmstrips
- Marking Clips in the Filmstrip
- Flagging a Clip

36. Creating a Timeline

- Create Timeline Using Selected Clips
- Creating an Empty Timeline
- Creating a Fast Stringout Timeline
- Creating Timelines from Bins

- Dynamic Project Switching

37. Drag & Drop Editing

- Clip Dragging Options
- Using the Overwrite Clip Button
- Drag & Drop Overwrite Edits
- Video Only Overwrite Edits
- Resizing the Video Track
- Creating New Tracks via Dragging
- Overriding Clip Linking
- Adding Tracks via the Track Header

38. Playhead Jumping

- Jumping the Playhead to Edit Points
- Using Auto Select to Control Playhead Jumping

39. Editing with More Precision

- Overwrite Edits
- Checking Destination Targets
- Previewing the Edit
- Changing Pre-Roll & Post-Roll
- Match on Action Edit
- 3-Point Edits
- Insert Edits
- Overwriting to Track V2
- Track Destination Shortcuts
- Moving a Clip to Another Track

40. Matching Action

41. Making a Dialogue Edit

42. Replace Edits

- Using the Timeline Viewer Overlays

43. Ripple Overwrite Edits

44. Backtimed Edits

45. Shuffle Edits

46. Other Editing Options

- Roll Edits
- Nudging Clips
- Making Clip Selections
- Blade Edits
- Through Edits
- Lift & Ripple Delete Edits
- Keyboard Editing
- How Auto Select Governs an Edit

47. Refining the Dialogue

- Creating a Split Edit in the Source Viewer
- Creating a Split Edit in the Timeline
- Shortcuts for Choosing a Trim Type
- Closing a Gap
- Performing a Video Split Edit

48. Maintaining Sync

- Disabling Clip Link
- Out of Sync Warning
- Resyncing Clips
- Creating Linked Relationships
- Linking Multiple Clips

49. Fit to Fill Edits

- Applying Optical Flow

50. Working with Markers

- Adding a Timeline Marker
- Navigating to Markers
- Adding a Clip Marker
- Ripple Timeline Markers

- Viewing Markers in the Edit Index

51. Clip Grouping Methods

- The Take Selector
- Compound Clips
- Editing the Contents of a Compound Clip
- Decomposing a Compound Clip
- Nesting Timelines

52. Multicam Editing

- Creating a Multicam Clip
- Choosing Multicam Clip Properties
- Choosing a Syncing Method
- Creating a Timeline from a Multicam Clip
- Viewing the Contents of a Multicam Clip
- Setting up for a Multicam Switch or Cut
- Controlling what Elements are Switched or Cut
- Choosing an Audio Angle for Monitoring
- Cutting Angles in the Source Viewer
- Trimming an Edit Point
- Manually Switching Angles

53. Reorganizing a Multicam Clip

- Changing Angle Priority
- Renaming Angles

54. Using the Trim Tool

- How Trimming Works in Resolve
- Rule that Governs Ripple Edits
- How Auto Select Toggles Affect Trimming
- Auto Select Shortcuts
- Trim Tool Main Functions
- Dual-Sided Ripple Trims
- Identifying Available Media (Handles)
- Slip Edits
- Slide Edits
- Roll Edits

55. Trimming in the Source Viewer

56. Keyboard Trimming

- More Ripple Editing Rules

57. Trimming with Timecode

58. Dynamic Trimming

- Dynamic Trimming Method 1
- Dynamic Trimming Method 2
- Multiple Selection Dynamic Trims

59. Trimming to the Playhead

- Trim Start/Trim End
- Extend Edits

60. Multi-Selection Trimming

- Asymmetric Trimming
- Real World Examples

61. Working with Transitions

- Locating Transitions
- Adding a Transition
- Adding Video and Audio Cross Dissolves
- Targeting Video or Audio for Transitions
- Adding Transitions with the Keyboard
- Adding Transitions to Multiple Edits
- Setting a Standard Transition

62. Modifying Transitions

- Changing Alignment
- Swapping Transitions
- Changing Transition Properties
- Changing the Transition Style
- Changing the Easing
- Creating a Custom Transition with Curves
- Shaping the Curve

63. Filter & Smart Cache

- Enabling Smart Cache
- Searching for Effects

64. Using the Smooth Cut Transitions

65. Working with Audio

- Compatible Audio Files
- Rolling the Audio
- Adding a Cross Fade
- Changing the Cross Fade Type
- Unlinking the Audio
- Adding Fades
- Disabling Audio
- Track Copy/Paste Rules

66. Using Markers for Audio Work

- Editing Music

67. Working with Audio Channels

- Adding an Audio Track
- Mono vs Stereo Track Assignments
- Displaying Individual Audio Channels
- Changing the Track Type
- Editing Independent Channels
- Changing Audio Clip Attributes
- Remapping Audio Channels

68. Setting Audio Levels

- Using Audio Overlays
- Copy and Paste Audio Attributes
- Using Audio Keyframes

69. Audio Mixing

- Audio Output Remapping
- Assigning Track Type
- Mute and Solo
- Pan Control

- Volume Reset
- The Master Channel
- Revealing Audio Track Overlays
- Benefit of Using Track Overlays
- Recording Automation
- Touch, Latch & Write Automation
- Set to Touch After Write
- Making Adjustments to Automation Keyframes
- Clip Automation

70. Audio Filters

- Applying a Filter to a Clip
- Removing Audio Filters
- Revealing the Filter Interface
- Applying a Filter to a Track
- Working with the Master Track

71. Exporting for Audio Workstations

- Exporting to ProTools

72. Working with Effects

- Adding a Fade Effect
- Adding a Letterbox Effect
- Modifying the Effect in the Color Page

73. Transform Controls

- Rotate, Anchor Point, Pitch & Yaw
- Resetting the Transform
- Keyframing an Effect
- Opening the Keyframe Editor
- Changing the Interpolation
- Flip and Flop
- Transforming in the Timeline Viewer
- Resetting Transform Parameters

74. Compositing Controls

- Choosing a Composite Mode
- Changing Opacity

75. Adding Titles

- Using Place on Top
- Editing the Title
- Adding a Background
- Copy & Paste a Title
- Animating Titles
- Smoothing the Animation
- Easing the Motion
- Pasting Title Attributes

76. Speed Effects

- Changing Clip Timing - 2 Methods
- Change Clip Speed
- Retiming a Clip
- Dragging to Change Speed
- How Audio is Handled
- Variable Speed Effects
- Adding a Speed Point
- Applying Optical Flow
- Changing the Speed of Segments
- Speed Presets
- Speed Ramp

77. Color Page Effects

- Overview of the Color Page
- Stabilizing a Shot
- Tracking an Object for Blurring
- Adding a Node
- Creating a Shape (Window)
- Creating a Custom Shape

78. Combining Takes Using Shapes

79. Keying

- The Qualifier Palette
- Using the 3D Keyer
- Enabling Highlight Control
- Viewing a High Contrast Matte
- Removing Noise

- Inverting the Matte
- Removing Spill
- Creating a Compound Clip

80. Exploring the Color Page

- Viewing Timecode
- The Gallery
- Creating a Still for Shot Comparison
- Exploring Wipe Options
- Saving Grades in the Gallery
- The Node Editor
- How Nodes Work
- The Timeline
- The Mini Timeline
- Adjustment Palettes
- The Color Wheels
- The Curves Editor
- The Keyframe Editor
- The Video Scopes
- The Toolbar
- Adding Window Burn

81. Remote vs. Local Grades

- Creating a Grade Version
- Switching Between Versions
- Remote and Local Versions
- Copy Remote Grades to Local

82. Automatic Color Adjustments

- Using Automatic Adjustment
- Previewing the Grade
- Resetting a Grade
- Using Split Screen
- Automatic Shot Matching

83. Manual Color Adjustments

- Gain Controls
- Gamma Controls
- Lift Controls
- Contrast Controls

- Finding a Representative Clip to Grade
- Reducing Gain to Retrieve Detail
- Reducing the Shadows
- Using the Offset Control
- Making Contrast Adjustments First
- Resetting the Color Wheels
- Lift, Gamma, Gain Sliders
- Curves Control
- Creating an S-Curve
- Targeted Curve Adjustments
- Benefits of Using Curves vs. Color Wheels
- Hue vs. Sat Curve

84. Copying & Matching Grades

- Saving a Still
- Matching Grades
- One Still per Scene
- Creating a Split for Shot Comparison
- Analyzing the Images in the Scopes

85. Making Secondary Adjustments

- Using a Qualifier
- Finessing the Qualifier
- Types of Qualifiers
- Isolating a Face
- Tracking a Window

86. Using 3rd Party Plugins

- Correcting Barrel Distortion
- Using the Sizing Palette

87. Removing Unwanted Camera Movement

88. Broadcast Safe Controls

89. Preparing a Project for Output

- Changing the Starting Timecode
- Starting Your Program at 1:00:00:00
- Adding Pre-Program Elements

90. Delivering Your Movie

- Render Settings
- Rendering a Single Clip
- Render Timeline as Options
- Choosing a Video Format to Render
- Choosing a Resolution
- Audio Export Options
- Choosing File Options
- Rendering Image Sequences
- Setting Additional Outputs
- Add to Render Queue
- Adding More Jobs to the Render Queue
- Updating a Job
- Starting a Render
- Power User Tip
- Wrap Up
