

DaVinci Resolve 12.5 - New Features

1. Introduction

2. New Format Support

3. Project Manager New Features

- Archiving Options
- Exporting Projects from the Project Manager

4. Menu Changes

- New Changes to the Interface
- Streamlined Edit Menu
- Exploring the New Trim Menu
- Exploring the New Timeline Menu
- Adding Blanking (Letterboxing)
- Exploring the Clip Menu

5. Overall UI Changes

- Customizing the List View
- Creating a Column Layout
- Cinema Viewing Mode
- VST Plugin Management
- Improvements to Autosave
- Manual Save Reminder
- Revert to Last Save Command
- New Project Settings
- Hardware Management Settings

6. Improved Interoperability

- Choosing Field Dominance
- Importing & Re-conforming Projects
- Using Offline Reference Movies
- Finding Timeline in the Media Pool
- Linking Offline Reference Clips
- Managing Missing Media
- Show Offline Reference for Non-Conformed Edits

- Comparative Viewer Modes
- Comparing Clips Using Difference Modes
- Synchronizing with Difference Modes
- Exporting Clips with Alpha Channel
- Rendering Alpha Output Nodes

7. New Media Page & Pool Features - Part 1

- Improvements in the Media Page & Media Pool
- Adding Volumes in the Media Storage Browser
- Manually Mounting Volumes
- Dynamically Mounting Volumes
- Update Media Storage/Pool UI
- Exposing Bit Depth in List View
- New Sorting Options in Icon View
- Setting a Poster Frame for a Clip
- Sorting Options in List View
- Sorting the Bin List
- Show/Hide Smart Bins
- Creating Power Bins
- Saving Timeline Clips to the Media Pool

8. New Media Page & Pool Features - Part 2

- Relinking Clips
- Batch Relinking Across Multiple Clips
- Relinking with Deep Search
- Deinterlacing
- Choosing Deinterlace Quality
- Improvements to Display Names
- Modifying Display Names
- Generating Display Names with Metadata
- Batch Editing Display Names

9. New Media Page & Pool Features - Part 3

- Other Uses of Metadata Variables
- Variable Data Burn In
- Naming Files with Variables
- Editing Metadata
- Improved Keyword Field
- Keyword Tag Dictionary
- Batch Adding Keywords
- Exporting Metadata

- Importing Metadata
- Editing Metadata Files
- Choosing Metadata Import Options
- Exporting an Edit Index
- Edit Index Options

10. Viewer Enhancements

- Viewer Improvements
- Using the Viewer Jog Controls
- Preview Marks
- The Viewer Mute Control
- Source Viewer Waveform Modes
- Zooming the Viewer with Scrolling
- Looping Playback
- Switching Viewer Metadata Display Mode

11. Timeline Enhancements

- Timeline Improvements
- Creating a New Timeline
- Creating a Timeline in an Empty Project
- Adding Tracks to a Timeline
- Color Coding Clips in the Timeline
- Filtering Clips in the Color Page According to Color
- Enabling Playhead Shadow
- Changing the Playhead Shadow Length
- Timeline Scrolling with Middle Mouse Click
- Playhead Indicator
- Accessing Clip Attributes in the Timeline
- Find Current Timeline in Media Pool

12. Enhanced Editing Commands - Part 1

- New & Improved Editing Commands
- Track Destination Controls
- Switch to Timeline After Edit
- Edit Overlays
- Setting the Default Edit Action
- Ripple Overwrite Improvements
- Fit to Fill Improvements

13. Enhanced Editing Commands - Part 2

- Editing a Stringout into Your Timeline
- Swapping Timeline & Source Viewer
- Editing in Selected Clips with Handles
- Performing a Ripple Cut
- Performing a Paste Insert
- Copy & Paste Using In/Out Ranges
- Paste Attributes Improvements
- Copying & Pasting Keyframes

14. Trimming Enhancements

- Trimming Commands
- Enabling Selection Follows Playhead
- Performing Nearest Edit Trim Commands
- Assigning Keyboard Shortcuts
- Ripple Start & End Commands
- Slip & Slide Trim Modes
- Disabling the 4 Up Trim Display
- Disabling the 2 Up Roll Edit Display

15. Updated Swap Edit

- Swap Edit Improvements
- Performing a Multi Clip Swap Edit
- Understanding Swap Edit Priority
- Creating an Extra Track for Swap Editing

16. Marker Improvements

- Improved Markers
- Selecting Multiple Markers
- Marker Text Indicators
- Improved Marker Dialog
- Setting Marker Duration
- New Add Marker Command
- Marker Contextual Menu

17. New Multicam Functionality

- Multicam Improvements
- Creating a Multicam Clip
- Same Camera Angle Detection

- Naming Angles
- Displaying Multicam Angles
- Switching Between Angle Views
- New Keyboard Shortcuts
- Flattening Edited Multicam Clips
- Synchronizing Angles

18. Transition Enhancements

- Transition Improvements
- Applying a Non-Additive Dissolve
- Saving Transition Presets
- Video Transition Shortcut
- Audio Transition Shortcut
- Batch Timeline Transitions

19. Working with Titles & Generators

- Improved Titles & Generators
- Edit Title Text in the Viewer
- Re-Positioning Your Title
- Editing the Title Generator
- Saving Title Clips to the Media Pool
- Selecting Text Boxes Independently

20. Retiming Clips

- Speed Effects Improvements
- Performing a Ripple Retime
- Using the Retime Curves
- Using the Retime Frame Curve
- Speed Point Controls
- Adjusting the Amount of Frames Represented in the Curve Editor
- Changing the Retimed Range
- Using the Retime Speed Curve
- Retiming with Bezier Curves
- Working with Retiming Curves Simultaneously
- Adding and Changing Speed Control Points

21. Working in the Keyframe & Curve Editor

- Opening the Effect Curve Editor and Keyframe Editor
- Improved Keyframe Editor
- Adjusting Multiple Keyframes

- Copying and Pasting Keyframes
- Expanding Keyframe Editor Master Tracks
- Curve Editor Improvements
- Adjusting Control Points with the Keyboard

22. New Inspector Functionality & Features

- Improved Effects in the Inspector
- Reviewing the New Composite Modes
- Accessing Composite Modes in the Color Page
- Enhanced Crop Controls
- Applying Softness to Your Crop
- Using Dynamic Zoom/Ken Burns
- Choosing a Dynamic Zoom Ease Option
- Compatibility with Final Cut Pro
- Correcting Lens Distortion
- Applying Lens Correction
- Manually Correcting Distortion
- Upgraded Inspector Functionality
- Applying Relative Adjustments to Multiple Clips
- Absolute Adjustment of Multiple Clips

23. Working with Audio

- Audio Improvements in the Edit Page
- Adjusting Audio Levels
- Changes to the Audio Meters
- Changing Audio Meters to VU
- Resizing Audio Tracks
- Using the Playhead Shadow
- Changing the Viewer Zoom Level
- Improved Track Labels
- Changing the Header Display in the Audio Mixer

24. Creating a Fusion Connect Clip

- Fusion Connect Workflow
- Creating a Freeze Frame
- Creating a Fusion Connect Clip
- Creating a Fusion Clip for Hand-off
- Working with Fusion Connect Clips

25. Working in Fusion

- Using Nodes/Tools in Fusion
- Compositing with Fusion
- Scaling the Background
- Outputting to Resolve

26. Creating Fusion Connect Versions

- Creating Versions with Fusion Connect
- Outputting Versions to Resolve
- Selecting Fusion Clip Versions
- Making Revisions to Your Fusion Connect Clip
- Setting Up Remote Versions in Fusion

27. Resolve Color Management

- Color Page Improvements
- Resolve Color Management
- Choosing Color Spaces
- Using Separate Color Space and Gamma
- Choosing Tetrahedral Interpolation
- New Blackmagic 4.6k LUTs

28. Node Editor Enhancements

- Node Editor Improvements
- Overwriting Connection Lines
- Adding Node Lines
- Swapping Nodes
- Copying One Node to Another
- Extracting Nodes
- Rearranging Nodes
- Panning the Node Editor
- Updated Contextual Menu in the Node Editor
- Resetting Single Nodes
- Navigating Nodes with the Keyboard
- Display Switching in the Node Editor

29. Gallery Enhancements

- Gallery Improvements
- Appending a Compound Node from the Gallery
- Applying Keyframes to Nodes in the Gallery

- Transforming in Split Screen Mode
- New Wipe Styles
- Selecting Clips in Split Screen Mode
- Selecting Versions in Split Screen Mode

30. New Tracking Functionality

- Improvements to Resolve's Tracker
- Applying Stabilization to Stills
- New Keyframe Controls in the Tracker Palette
- Resolve's New Point Tracker
- Performing an Offset Track

31. Improved Grading Controls

- Improved Grading Controls
- Temperature & Tint Controls
- Improved LOG Controls Accuracy
- Legacy LOG Controls
- Disabling the S-Curve for Contrast
- New Composite Modes
- New Color Match Charts

32. New Power Window Functionality

- Improvements to the Window Controls
- Changing the Window Outline Color
- Changing the Linear Window Size with Aspect Sizing
- Moving Multiple Control Points at Once

33. Working with HDR

- HDR Support in 12.5
- Setting up for HDR Grading
- Enabling HDR Scopes
- HDR Mode for Individual Nodes
- Changing the Display Nit Value
- HDR Grading with LUTs
- HDR Grading with HLG Standard

34. Additional Color Features

- Misc New Color Features
- Reset Blanking
- Changes to Noise Reduction

- Spatial Noise Reduction Improvements
- Choosing 5 Frames in Temporal Noise Reduction
- Better Mode in Spatial Conform
- Applying ARRI CDL & LUT
- Using the Alpha Channel in DaVinci Resolve
- Changes to Node Caching
- Caching and Optimizing HDR Media

35. Working with DCTL LUTs

- DCTL LUTs
- DCTL Resources in the DaVinci Resolve Manual
- Using DCTL LUTs

36. OpenFX Enhancements

- Improvements to OpenFX

37. Working with ResolveFX

- Working with ResolveFX
- Demonstrating the Film Grain Plugin
- Demonstrating the Glow Plugin
- Demonstrating the JPEG Damage Plugin
- Demonstrating the Light Rays Plugin
- Demonstrating the Lens Flare Plugin
- 3d Lens Flare Effects
- FX Tracking
- Tracking a Lens Flare

38. Deliver Page Enhancements

- Improvements to the Deliver Page
- The Render Settings
- Render Presets
- Video Render Settings
- Audio Render Tracks Options
- File Render Options
- Revealing Hidden Options
- Deliver Page Timeline Changes
- Enabling & Disabling Thumbnail View
- Track Header Controls
- Choosing a Render Range
- Thumbnail Timeline Options

- The Render Queue
- Editing Jobs
- Displaying Job Details
- Enabling Remote Rendering
- Headless Remote Rendering
- Remote Rendering to Quicktime Compatible Systems
- Revealing a Job in Media Storage or Finder
- Video Rendering Improvements
- Choosing an EXR Compression Level
- Top Bottom Monitoring and Rendering for Stereo Audio
- New Render Speeds
- Render Progress Bar
- 3:2 Pulldown Insertion
