

Editing & Color Grading 101 in DaVinci Resolve 15

1. Exploring Resolve

- Exploring Resolve
- The Media Page
- The Edit Page
- The Fusion Page
- The Color Page
- The Fairlight Page
- The Deliver Page
- The Processing Pipeline

2. Understanding Resolve

- Setting Up the Project Media
- Resolve's Database Organization
- Example Organizational Workflows
- Example Organizational Workflows
- Switching & Backing Up Databases
- The Project Manager
- Importing, Exporting, and Archiving Project
- Sharing Media, Projects & Archives
- Review

3. Before Getting Started

- Creating a Project
- Important System Preferences
- Setting up a Scratch Disk
- Important User Preferences
- Auto Save
- Editing
- Keyboard Mapping
- Creating Keyboard Shortcuts
- Critical Project Settings
- Resolve's Resolution Independence
- Frame Rate Settings
- Optimized Media
- Image Scaling
- Color Management
- Subtitles And Captions

4. Importing Media

- Preparing the Project Media
- Media Page Overview
- Favoriting Media Locations
- Previewing Media
- Importing Media and Folders
- Sorting Media & Editing Metadata
- Set Poster Frame
- Custom Metadata Sets
- Creating Custom Column Layouts
- Creating Smart Bins
- Modifying Clip Names
- Importing Metadata
- Exporting Metadata
- Changing Clip Names With Variables

5. Importing Projects & Syncing

- Importing Projects
- Relinking Media
- Synchronizing Audio and Video
- Manually Syncing
- Auto Syncing
- Marking Clip Ranges
- Setting In and Out Points
- Setting Duration Markers
- Navigating with Timecode
- Color Coding Bins

6. Marking & Assembling Clips

- Introduction to the Edit Page
- Switching Timelines
- Creating a New Timeline
- Setting Up Render Caching
- Making the First Edit
- Marker Overlays & Live Media Preview
- Editing with Overlays
- Drag and Drop Editing
- Performing Video and Audio Only Edits
- Editing with the Toolbar Buttons
- Editing with Track Destination Selection

- Locking Tracks
- Editing with Keyboard Shortcuts
- Performing a Swap Edit

7. Working in the Timeline

- Adding Music
- Adjusting Timeline Zoom
- Customizing Your Timeline
- Marking the Beat
- Adjusting Clip Volume
- Moving Clips
- Deleting Audio & Video Separately

8. Advanced Editing Techniques

- Navigating with Timecode
- Deleting Gaps
- Assigning Clip Colors
- Performing an Insert Edit
- Using Auto Track Selector
- Muting & Soloing Audio Tracks
- Scrubbing with JKL
- Ripple Delete

9. Refining the Edit

- Referencing the Camera Audio
- Performing a Replace Edit
- Basic Trimming
- Enabling & Disabling Snapping
- Trimming To the Playhead
- Trimming During Loop Playback
- Trimming with the Keyboard
- Adjusting Pre & Post-Roll Duration

10. Working with Photos

- Working with Photos
- Performing a 3-Point Edit
- Adjusting Frame Scaling
- Moving Clips with Timecode
- Using Dynamic Zoom
- Using the Trim Tool

- Ripple Trimming
- Slip & Slide Edits

11. Mixing Audio in the Edit Page

- Customizing the Interface for Audio Mixing
- Saving UI Layout Presets
- Monitoring Audio Levels
- Setting Volume Levels in the Inspector
- Assigning Clip Color in the Media Pool
- Pasting Volume Attributes

12. Working with Audio Keyframes

- Setting Keyframes in the Inspector
- Setting Keyframes in the Timeline
- Sub-Frame Audio Editing

13. Managing Tracks in the Edit Page

- Adding Tracks
- Naming Tracks
- Setting Track Colors
- Applying Audio Fades
- Adding an Audio Only Transition
- Modifying Transitions

14. Adding Video Transitions

- Adding Video Transitions
- Modifying Transitions
- Transition Curves
- Saving Transition Presets
- Setting Standard & Favorite Transitions
- Dragging a Cross Dissolve
- Smooth Cut Transition

15. Adding Effects

- Adding a Filter Effect
- Retiming & Reversing Clips
- Using the Retiming Controls
- Adding Speed Points
- Adding a Freeze Frame
- Setting a Retime Curve

- Retime Processing

16. Working with Titles

- Adding Titles
- Using the Fit to Fill Edit
- Modifying Titles
- Displaying Safe Areas
- Animating Titles
- Using Fusion Title Templates
- Using Title Shading Elements
- Resetting Default Values in Fusion

17. Altering Project & Clip Framing

- Reframing the Timeline
- Using Marker Annotations
- Using the Edit Index
- Navigating with the Edit Index

18. Basic Keying

19. Working in Fusion

- Moving to the Fusion Page
- Stabilizing a Shot
- Assigning Nodes to a Viewer
- Improving Playback Performance
- Adding Nodes with the Toolbar

20. Titles in Fusion - Part 1

- Switching Timelines and Clips
- Adding Text to Video
- Reading the Nodes
- Creating Video in Text
- Animating with the Follower
- Adjusting Timing with the Keyframe Editor
- Easing With the Spline Editor

21. Titles in Fusion - Part 2

- Placing Text on a Path
- Animating the Path

- Creating Versions in Fusion
- Tracking Text to an Object
- Adding Filters to a Clip

22. Resolve Media Management

- Entire Project, Timelines & Clips
- Copy, Move, or Transcode
- The Clone Tool
- Cloning Media

23. Intro to the Color Page

- Restoring an Archive
- Navigating in the Color Page
- Filtering Clips
- Preparing for Color Grading
- Reading Waveforms & Parade Scopes
- Reading the Vectorscope

24. Primary Color Correction

- Simple Primary Correction
- Adjusting Luminance and Contrast
- Assessing Color Balance
- Using the Qualifier
- Adjusting Temperature & Tint
- Primary Correction with Curves
- The Primaries Bars
- Color Balancing with Curves
- Copying Grades
- Auto-Shot Matching
- Comparing Shots
- Comparing with Lightbox

25. Grading Multiple Shots

- Grading Multiple Shots
- Grouping Shots
- Shared Nodes
- Stabilizing A Clip

26. Secondary Color Correction - Part 1

- Understanding Nodes

- Using Windows
- Using Hue Vs Hue
- Combining Windows and Qualifiers
- Using the 3D Qualifier
- Tracking a Window
- Adjusting a Track
- Tracking Through Obstacles

27. Secondary Color Correction - Part 2

- Creating Versions
- Adding Effects in the Color Page
- Using Gallery Presets
- Creating Looks
- Creating a B&W Look
- Saving and Applying Stills
- Mixing Nodes
- Loading & Using LookUp Tables
- Applying a LUT
- Comparing Versions

28. Sound Editing in Fairlight

- Exploring the Fairlight Page
- Previewing Video
- Moving, Renaming & Color Tagging Tracks
- Viewing Spotting Lists
- Resetting & Editing Clips
- Clip Editing Basics
- Track Layering
- Fade In & Out to Playhead
- Selecting Ranges & Looping
- Adjusting Levels

29. Audio Mixing in Fairlight

- Creating Buses
- Assigning Busses
- Automating The Mixer
- Applying an Equalizer

30. Automatic Dialogue Replacement

- Configuring Fairlight for Recording

- Editing Voice Over Audio
- Configuring ADR
- Adding Cues
- Recording Dialog Replacement
- Audio Capture Location

31. Fairlight FX

- Hum Removal
- Noise Reduction
- Adding a Sound Effects Library
- Adding Sound Effects to the Timeline
- Reverb

32. Delivering a Project

- Using a Render Preset for Web Delivery
- Adding Watermarks & Data Burn-Ins
- Creating a Custom Preset
- Rendering Jobs
